Setting the Amount of Reverb

Reverb adds echo to the sound to give it more fullness and reverberation.

Use the REVERB control to adjust the depth (the degree to which the reverb effect is applied to the sound). To turn the reverb off, set the control in the far left position.

You can also change the type of reverb to apply.

Reverb type	Effect	Setting method
Room	Reverberation similar to that heard in a normal room	Hold down the A-1, A#-1, and B-1 keys and press C2.
Hall 1 (Default setting)	Reverberation similar to that heard in a small concert hall	Hold down the A-1, A#-1, and B-1 keys and press D2.
Hall 2	Reverberation similar to that heard in a large concert hall	Hold down the A-1, A#-1, and B-1 keys and press E2.

The reverb function reverts to its default setting when you turn the power off.

Adjusting the Pitch (Tuning)

The pitch of this instrument is set so that A3=440Hz. You can fine tune the pitch up or down 65 cents in 1 cent steps (100 cents is equal to 1 semitone).

Operation	Setting method
Raise the pitch	Hold down the A-1 and B-1 keys and press any one of the keys between C3 and B3.
Lower the pitch	Hold down the A-1 and A#-1 keys and press any one of the keys between C3 and B3.
Return to default tuning	Hold down the A-1, A#-1, and B-1 keys and press any one of the keys between C3 and B3.

The pitch setting is stored when you turn the instrument off.

Setting the DDE (Dynamic Damper Effect)

The DDE (Dynamic Damper Effect) recreates the subtle resonances that occur when you depress the damper pedal on an acoustic piano. You can set the DDE to suit your preferences.

Operation	Setting method
Turn the DDE off	Hold down the A-1, A#-1, and B-1 keys and press C6.
Turn the DDE on (5 levels)	Hold down the A-1, A#-1, and B-1 keys and press D6, E6, F6, G6 or A6. (A6 is the deepest DDE setting. The default setting is E6)

The DDE setting does not change when you turn the power off.

Note

Even when the DDE is turned off, the sound continues as if you had pressed the damper pedal, but without any resonating effect.

Returning Settings to Their Default Configuration (Reset All)

You can reset all settings to their default state.

Hold down the A-1, A#-1, and B-1 keys and press C7, the highest key on the keyboard.

This returns reverb, pitch, and DDE to their default settings.

Troubleshooting

If you have problems with your Silent Piano, here are a few troubleshooting tips. If you cannot solve the problem easily yourself, consult your Yamaha piano dealer. DO NOT attempt to repair the piano or the AC adaptor yourself.

🔊 **The POWER lamp lights but the instrument does not emit any sound, and the pedal has no effect.**

- Are the cable connectors firmly connected to the rear of the control box? The instrument may not output sound and the pedal may not function if the cables are disconnected for any reason.

🔊 **The sound does not stop when I release a key.**

The sound lingers.

The sound is unclear and has an echo.

- The reverb knob may be set to its maximum setting. Adjust the reverb to an optimal level.
- Is the DDE set to an appropriate level?

🔊 **The sound is distorted.**

- Playing chords strongly with the volume set at maximum level may cause distortion of the sound, but is not an indicator of damage to the instrument.
